

**Lesotho, Mozambique, Zimbabwe** (to the tune of “I Will Survive”)

When HIV and AIDS arrived  
We were petrified  
We know we could never live without SLF at our side  
But then we spent so many nights thinkin’ pandemics are strong  
Then we grew strong and learned how to get along

Stride on - we’ll track to **Lesotho**  
We will just stride there; see how SLF is helping grannies’ plans to grow  
We want to rid that pandemic  
I’m sure you will all agree  
mothers2mothers is helpful and necessary

Go on now! HIV and AIDs Go!  
We don’t want you around; you’re not welcome anywhere  
You’ve been the one who tried to hurt us - made us cry  
But we won’t crumble. We won’t lie down and die.

Oh! Not Us! We will survive  
As long as we know how to help, we’ll help all stay alive  
We’ve got our lives to live, plus help and love to give  
And we’ll survive, we survive, hey, hey

Let's stride on to **Mozambique**

Grans' work is unique

SLF at their side, working for better health is neat

*The Mozambique Treatment Access Movement (MATRAM)* was born

Health care, education, advocacy all belong

SLF helps those in poverty

*Organization for Rural Development* – in Kukumbi

Let's eradicate poverty

And develop community

Build stronger resilience and develop capacities

Go on now! HIV and AIDs Go!

We don't want you around; you're not welcome anywhere

You've been the one who tried to hurt us - made us cry

But we won't crumble. We won't lie down and die.

Oh! Not Us! We will survive

As long as we know how to help, we'll help all stay alive

We've got our lives to live, plus help and love to give

And we'll survive, we survive, hey, hey

Let's head to **Zimbabwe** - See what's underway

*The Chiedza Child Care Centre* cares for orphans everyday

As does *Farm Orphan Support Trust (FOST)* help out in so many ways

Children grow strong and they learn how to get along

Yes child care - but how about this:

*Masasa Project*, plus a conference on “Women and Happiness”

Violence exists everywhere

Masasa helps women in need

Shelters, psycho-social, medical, legal support in speed

Go on now! HIV and AIDs Go!

We don't want you around; you're not welcome anywhere

You've been the one who tried to hurt us - made us cry

But we won't crumble. We won't lie down and die.

Oh! Not Us! We will survive

As long as we know how to help, we'll help all stay alive

We've got our lives to live, plus help and love to give

And we'll survive, we survive, hey, hey
